

Think  
Safety!!

# PUBLIC ENEMY #1

Watch out for  
motorcycles!!

***If you haven't been trained to drive a vehicle with one hand while being mentally stimulated from a non-related source, held in the other, when you need to react, it's likely that you may do the wrong thing.***

***Can you drive with a fraction of the perception, reflexes, and mental attachment?***

*(One insurance survey indicated hand held cell phone drivers have 1/3 longer reaction time than a drunk driver.)*

***Ever had to interrupt phone conversation while you are driving because of a traffic situation? Chances are you've also interrupted your driving at some point in a phone conversation. Your posture and mental state effect your driving....It effects everybodys! ----- WATCH OUT for PUBLIC ENEMY #1 -----***
